

VeriFone

Practical, Proven and Protected

NURIT 8320

Simplify payment and guard against fraud with this proven, all-in-one performer

You want a payment device that's secure, reliable, and won't clutter counter space. Your customers like a fast, easy way to pay. Satisfy everyone with the best-selling NURIT 8320 all-in-one payment device.

Need to process debit, credit, loyalty, or gift cards? NURIT 8320 provides exceptional performance and flexibility. The device not only makes quick work of card-based payments, but also runs value-added applications such as age verification and prepaid services, which generate new revenues for you.

The device will work with your choice of regular phone lines, a local area network, or optional GSM/GPRS wireless services. Its all-in-one design includes an internal PIN pad, whisper-quiet high-speed thermal printer, magnetic card reader, and privacy shield for customer confidentiality—all in a compact device that won't get in your way. And, for more versatility, you can always add peripherals such as an external PIN pad or check reader.

Equally important, you can relax knowing that the NURIT 8320 integrates sophisticated encryption, tamper resistance, and tamper evidence protections. Practical, proven, and protected—the all-in-one NURIT 8320 from VeriFone.

BENEFITS AT A GLANCE

- Convenient, all-in-one design
- Support for revenue-generating, value-added applications
- Flexible communication options
- Sophisticated protections against fraud and tampering

NURIT 8320

Practical, Proven and Protected

Features & Benefits

Plug It In

- Sets up in minutes—simply plug in the power cord, connect to a phone line or network, and you're in business!
- Ergonomically designed keypad and large backlit display make the NURIT 8320 exceptionally easy to use, helping to minimize training and reduce errors
- Graphical display accommodates a variety of fonts to support different languages
- Compact size frees counter space and allows the device to be handed to customers for PIN entry when required
- Integrated, high-speed thermal printer eliminates ribbon-changing and other complexities

Power It Up

- Complete payment processing solution—with vertical bi-directional magnetic-stripe card reader, smart card reader, PIN pad, and built-in printer—delivers maximum convenience
- Powerful 32-bit processor speeds transactions to get customers quickly on their way, and ample memory supports multiple payment and value-added applications simultaneously
- Wide variety of communication options—including built-in dial modem, optional GSM/GPRS wireless modem, or Ethernet LAN connection—enhances your processing flexibility
- Connect peripherals such as external PIN pads, check readers, or bar code wands as needed
- Optional internal battery pack offers up to five hours of operation without AC power

Protect Your Vital Information

- PED approved for PIN-based transactions
- MasterCard PTS approved for transaction communication security
- Secure internal PIN pad and advanced Triple DES encryption protects against fraud
- Tamper resistance and tamper evidence features guard against physical access to device
- Application separation prevents internal data corruption

The NURIT 8320 combines a card reader, PIN pad, and high-speed thermal printer in a single device for greater convenience.

Peripherals such as the NURIT 222 PIN pad or a check reader attach quickly and easily.
